

The All New Desire Range.

Engineered for Performance.
Designed for Living.

NEW RANGE

Meet Desire.

Purpose-built for Australian conditions, the Desire Range combines sleek design with thermally broken technology to enhance comfort, improving efficiency and liveability.

Advanced Thermal Break Technology

Keep homes warmer in winter and cooler in summer, lowering energy bills year-round.

Strong, Smart and Adaptable

Built with robust 100mm or larger frames to support heavy IGUs, automation and high-spec installations.

Halo Aquashield™ Compatible

Engineered to integrate with Wideline's patented weatherproofing system for ultimate protection.

Clean, contemporary design

Designed to blend seamlessly into modern architectural styles with flush sills, slim frames and smooth transitions.

It's more than just insulation.

A thermal break is a barrier of non-conductive material built into the aluminium frame. It separates the internal and external sections of the window or door, significantly reducing the transfer of heat and cold. This innovative design brings a range of benefits that go beyond comfort:

Reduced Condensation

Minimises moisture build-up on glass and frames.

Improved Acoustic Control

Helps reduce external noise when paired with IGUs.

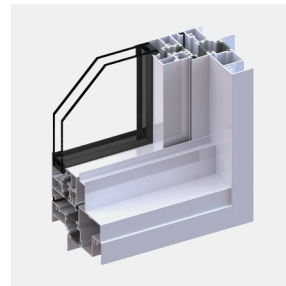

Energy Compliance

Supports BASIX and NatHERS energy targets.

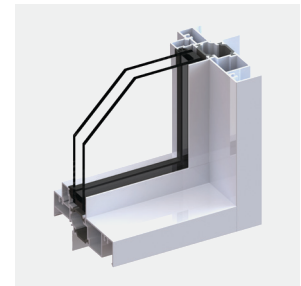

Enhanced Structural Capability

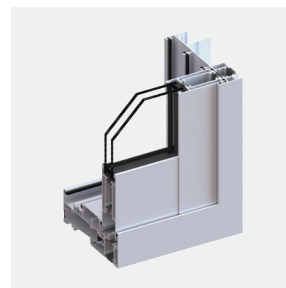

Handles larger, heavier glazing with ease.

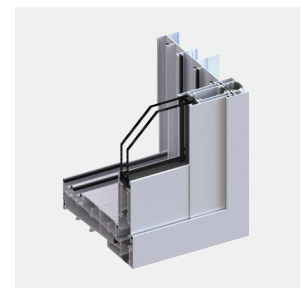

XAW-chain
Awning window

XF
Fixed window

XSDI
Sliding door

XSSD
Stacking door

Paired with Wideline's Aquashield™

All windows and doors in the Desire Range are compatible with Halo Aquashield™, Wideline's patented weatherproofing system, for even greater protection against air and water ingress
